Collection

Pius Meyer is a dedicated crane collector and the limited offerings on the market drove him early on to try his hands at scratch building.

Albert Schmid had to dig deep to research the background of the Liebherr R 991 model from Conrad. Unfortunately nobody remained who was involved in the development of this model in the 1980s.

Models

Since CCM began to produce the series of historical Caterpillar machines in 1:48 scale, collectors have been looking forward to the new, first class models. The newest release is the D 10...

Just as detailed are the models from WSI. The flagship of the Dutch manufacturer is the Mega Windmill Transporter by Nootboom. Two attractive versions were available for a review...

News

The Caterpillar D 10 made history in innovation in the industry, so much more reason to describe the prototype as well as the model

2000 meters of tram tracks were replaced in 52 hours. This required a massive use of construction equipment. Urs Peyer was there to document the action...
